MANUAL AS-IS PROCESSES · DEEP REFERENCE

Purchase-to-Pay, Order-to-Cash & Quotation

The full manual process — who does what at each step, what it produces, and every exception that can occur — with a suggested Robot / Agent / People handler for the UiPath to-be design. Order-to-Cash follows the PO-driven model (customer returns a Purchase Order against the quote).

WeCPQ · quoting

WeSAP · ERP

Combined manual walkthrough + exceptions catalogue • the complete as-is picture that drives the to-be automation

The cast Who does what — roles & the to-be legend

> Every step is owned by a specific role; the colours below carry through to the steps. Each step also lists the exceptions that can occur there, tagged with a suggested to-be handler once UiPath automation is in place.

SR — Sales Representative
SALES
Builds and sends customer quotes; wins or loses the deal.

SM — Sales Manager
SALES
Reviews and approves pricing when margin or discount is outside policy.

OA — Order Administrator
PROCUREMENT
Turns a won quote into a sales order in the ERP.

BP — Buyer / Purchaser
PROCUREMENT
Raises purchase orders to vendors for goods and services.

WC — Warehouse Clerk
WAREHOUSE
Receives incoming goods and ships outbound deliveries.

AP — Accounts Payable Clerk
FINANCE – AP
Registers vendor invoices and performs the 3-way match.

CC — Credit Controller
FINANCE – CREDIT
Checks a customer's credit limit and exposure before fulfilment.

FA — Finance / AP Manager
FINANCE – CREDIT
Approves releases — blocked invoices and credit holds.

BC — Billing Clerk
FINANCE – AR
Issues the customer invoice once goods are delivered.

AR — Accounts Receivable Clerk
FINANCE – AR
Collects the incoming payment and clears the account.

TC — Treasury Clerk
TREASURY
Executes the outgoing payment to the vendor.

Robot rules-based Agent judgement / comms People approval / escalation

Agent → People agent works it, human signs off

Process 1 Purchase-to-Pay (P2P)

WeSAP

> Purchase-to-Pay is how the company buys from vendors and pays them: raise an order, receive the goods, register and match the vendor's invoice, then pay. It runs end-to-end in WeSAP and is owned mainly by Procurement and Accounts Payable.

WHO'S INVOLVED: Buyer / Purchaser · Warehouse Clerk · Accounts Payable Clerk · Finance / AP Manager · Treasury Clerk

1 Buyer / Purchaser — PROCUREMENT — WeSAP

Raise the Purchase Order

Identifies the need, selects the vendor and the materials, and enters the quantities and agreed prices on a new Purchase Order in WeSAP. Saves it to send the formal order to the vendor.

→ Produces: **Purchase Order (status: Open)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Vendor not set up	Vendor missing or inactive in the master data.	Robot → wait / People
Material / item unknown	Item not in the catalog or no material master.	Agent → People
Missing or stale price	No agreed price, or price out of date.	Agent
Budget exceeded	Cost centre / budget not available for the spend.	People
Above approval threshold	PO value needs manager (or higher) sign-off.	People
Duplicate PO	Same need already ordered on another PO.	Robot
Off-contract purchase	No framework agreement covers the buy.	Agent → People

2 Warehouse Clerk — WAREHOUSE — WeSAP

Post the Goods Receipt

When the delivery arrives, checks it against the Purchase Order, counts the quantities received, and posts a Goods Receipt in WeSAP referencing that PO. This records that the goods physically arrived.

→ Produces: **Goods Receipt · PO marked Received**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Partial delivery	Quantity received is less than ordered.	Agent
Over-delivery	Received more than ordered, beyond tolerance.	Agent → People
Damaged / quality reject	Goods arrive damaged or fail QC.	Agent → People
Wrong item delivered	Delivered item differs from the PO.	Agent
Early / late delivery	Delivery outside the agreed schedule.	Robot
Goods with no PO	Unexpected delivery with no matching order.	Agent → People
PO already closed	Goods arrive against a completed/closed PO.	Agent

3 Accounts Payable Clerk FINANCE – AP WeSAP

Register the Supplier Invoice

The vendor's invoice arrives by email or post. The clerk opens the PDF and manually keys the invoice into WeSAP — vendor, amounts and line items — referencing the original PO.

→ Produces: **Supplier Invoice (status: Open)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Wrong / missing PO ref	Invoice cites no PO or a non-existent one.	Agent
Duplicate invoice	Same invoice already entered.	Robot
Illegible / incomplete	Missing amounts, tax ID or key fields.	Agent
Vendor bank change	Bank details differ from master (fraud risk).	Agent → People
Currency mismatch	Invoice currency differs from the PO.	Robot
Tax / VAT error	Tax missing or calculated incorrectly.	Agent
Non-PO invoice	Services invoice with no PO to match.	Agent → People

4 Accounts Payable Clerk FINANCE – AP WeSAP

3-way match

Performs the 3-way match by hand: compares the Purchase Order, the Goods Receipt and the Invoice on price and quantity. If everything agrees within tolerance, the invoice is cleared for payment.

→ Produces: **Invoice Matched (within tolerance)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Price mismatch	Invoice price above PO price beyond tolerance.	Agent → People
Quantity mismatch	Invoice qty differs from goods-receipt qty.	Agent
Missing goods receipt	No GR posted, so 3-way match can't complete.	Agent
Unexpected charges	Freight / fees on the invoice not on the PO.	Agent → People
Tax discrepancy	Tax on invoice differs from expected.	Agent
Invoice math error	Line totals don't sum to the invoice total.	Robot
Rounding outside tolerance	Small differences that breach the band.	Robot

5 Finance / AP Manager FINANCE – CREDIT WeSAP

Approve / release

Reviews matched (and any resolved) invoices and approves them for payment. Blocked invoices only reach this step once the discrepancy has been fixed and re-matched.

→ Produces: **Invoice Released / Approved**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Approver unavailable	Sign-off stalls (out of office, bottleneck).	People
Rejected	Manager rejects; back to investigation.	Agent → People
Above authority limit	Exceeds approver's limit; escalate higher.	People
Missing documentation	Supporting evidence not attached.	Agent
Policy exception	Out-of-tolerance but justified; needs override.	People

6 Treasury Clerk TREASURY WeSAP

Post the payment

Schedules and executes the outgoing payment to the vendor in WeSAP, which clears the invoice. The document flow is now complete: PO → Goods Receipt → Invoice → Payment.

→ Produces: **Payment posted · Invoice Paid**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Cash-flow hold	Insufficient funds; payment deferred.	People
Terms not met	Early/late run; risk of losing a discount.	Agent
Bank details unverified	Vendor bank change needs verification.	Agent → People
Duplicate-payment risk	Invoice may already have been paid.	Robot
Payment rejected	Bank bounces the payment.	Agent
Credit note / offset	Credit note or deduction to apply first.	Agent
Blocked vendor	Vendor flagged (compliance / sanctions).	People

Process 2 Order-to-Cash (O2C)

WeCPQ + WeSAP

> Order-to-Cash turns a won customer quote into delivered goods and collected cash. In this PO-driven model the customer returns their own Purchase Order against the won quote, and that PO — matched back to the quote — triggers the Sales Order in WeSAP. Fulfilment then runs Delivery → Billing → Payment.

WHO'S INVOLVED: Sales Representative | Order Administrator | Credit Controller | Warehouse Clerk | Billing Clerk | Accounts Receivable Clerk

Precondition: a quote has been marked Won in WeCPQ (end of Process 3).

1 Sales Representative — SALES — WeCPQ

Confirm won deal / hand over

Confirms the deal is won in WeCPQ. The quote is marked Won and locked; its contents (customer, line items, totals) are the agreed basis the customer will reference on their purchase order.

→ Produces: **Won quote (read-only) in WeCPQ**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Incomplete quote	Missing info the customer needs to raise their PO.	Agent
Customer not in ERP	New customer needs onboarding before an order.	Agent → People
Expired / off-list price	Quote price no longer matches the price list.	Agent → People
Verbal side terms	Agreed terms not captured on the quote.	People
Scope change after win	Customer changes qty / scope after winning.	Agent

2 Order Administrator — PROCUREMENT — WeSAP

Receive the customer's Purchase Order

The customer approves internally and emails back their own Purchase Order, quoting the WeCPQ quote reference. The Order Administrator logs the customer PO and links it to the won quote. (In the to-be, a bot ingests the PO from the mailbox.)

→ Produces: **Customer PO received & logged (linked to quote)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Missing / late PO	No customer PO yet, so the order can't start.	Agent
Duplicate PO	Same customer PO received more than once.	Robot
Wrong / expired quote ref	PO references a wrong or expired quote.	Agent
PO for non-won quote	PO cites a quote not marked Won.	Agent
Illegible / incomplete PO	PO number, lines or amounts missing.	Agent

3 Order Administrator PROCUREMENT WeSAP

Match the customer PO to the quote

Verifies the customer PO against the won quote — price, quantities, line items and terms must agree before an order is created. This is the sales-side equivalent of the P2P 3-way match.

→ Produces: **PO matched to quote (ready to order)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Price mismatch	PO price differs from the quoted price.	Agent → People
Quantity mismatch	PO quantities differ from the quote.	Agent
Line items differ	PO adds or removes items vs the quote.	Agent → People
Terms changed	Payment / delivery terms differ from the quote.	People
Currency mismatch	PO currency differs from the quote.	Robot

4 Order Administrator PROCUREMENT WeSAP

Create the Sales Order from the customer PO

Creates the Sales Order in WeSAP from the matched customer PO, carrying the customer's PO number and the originating quote reference. Both stay on the order and flow through to the invoice so the customer can reconcile.

→ Produces: **Sales Order (Open) with customer PO number + quote ref**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Transcription error	Wrong qty / price keyed from the PO.	Robot
Product discontinued	Ordered item no longer available.	Agent → People
Missing master data	Ship-to, bill-to or tax data absent.	Agent
Incomplete order	Delivery address or dates missing.	Agent
Duplicate order	An order already exists for this PO.	Robot

5 Credit Controller FINANCE – CREDIT WeSAP

Credit check

Before the order proceeds, reviews the customer's credit limit and current outstanding balance to make sure the company is comfortable extending the credit.

→ Produces: **Credit checked · order may proceed**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Over credit limit	Order pushes the customer past their limit.	Agent → People
On credit hold	Customer already blocked for overdue debt.	People
No credit history	New customer needs a credit assessment.	Agent → People
Prepayment required	Terms must change to secure the order.	People
Limit review due	Credit line / insurance needs revisiting.	Agent

6 Warehouse Clerk WAREHOUSE WeSAP

Create the Delivery

Picks and ships the goods, then posts an Outbound Delivery in WeSAP, which deducts the items from stock.

→ Produces: **Delivery posted · stock reduced**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Stockout / backorder	Not enough stock to fulfil.	Agent → People
Partial shipment	Only part of the order can ship.	Agent
Wrong item picked	Pick differs from the order.	Agent
Logistics delay	Carrier / shipping delay.	Agent
Invalid address	Delivery address fails validation.	Agent
Damage / return	Goods damaged in transit; return raised.	Agent → People

7 Billing Clerk FINANCE – AR WeSAP

Issue the invoice (with customer PO number)

Once the goods are delivered, generates the billing document in WeSAP quoting the customer's PO number, so the customer can match the invoice to their own order, and sends it.

→ Produces: **Invoice issued (shows customer PO number)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Missing customer PO	Invoice lacks the PO ref the customer needs to pay.	Robot
Bill ≠ delivery/order	Amount doesn't match what shipped.	Agent
Tax determination error	VAT / tax wrong for the transaction.	Agent
Currency / price error	Wrong currency or pricing applied.	Robot
Partial billing	Bill only for the part delivered.	Agent
Credit memo needed	Return / adjustment requires a credit note.	Agent → People

8 Accounts Receivable Clerk FINANCE – AR WeSAP

Collect & clear payment

Monitors the customer account, matches the incoming payment (by their PO / invoice number) against the open invoice, and clears it. Cash is collected and the order is complete.

→ Produces: **Incoming Payment · Order Paid / Cleared**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Short / partial payment	Customer pays less than invoiced.	Agent
Overpayment	Customer pays more than due.	Agent
Unapplied cash	Payment can't be matched to an invoice.	Agent
Deduction / chargeback	Customer withholds part of the payment.	Agent → People
Late / non-payment	Overdue; enters dunning / collections.	Agent → People
Disputed invoice	Customer withholds a disputed amount.	Agent → People
Write-off	Bad debt to be written off.	People

Process 3 Quotation Management (CPQ)

WeCPQ

This is the sales process that feeds Order-to-Cash: preparing, pricing and winning a customer quote in WeCPQ. It is owned by Sales, with a manager approval when pricing needs sign-off. It ends the moment a quote is marked Won — which is exactly where Process 2 begins.

WHO'S INVOLVED Sales Representative Sales Manager

1 Sales Representative SALES WeCPQ

Open customer & start quote

Logs into WeCPQ, finds the customer on the dashboard, opens their record and starts a new quote for the opportunity.

→ Produces: **New quote (status: Draft)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Customer not in system	New prospect not yet set up.	Agent
Already quoted	Opportunity has an existing quote.	Robot
Missing contact details	No valid contact to quote / send to.	Agent

2 Sales Representative SALES WeCPQ

Configure & price the quote

Configures the quote: adds line items (products / vendors, quantities, unit prices), sets the margin percentage, and reviews the calculated subtotal and total.

→ Produces: **Priced quote (Draft)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Item not in catalog	Product / vendor not available to quote.	Agent → People
Missing / stale price	No current price for a line item.	Agent
Invalid configuration	Incompatible items combined.	Robot
Margin below floor	Margin under policy or negative.	Agent → People
Currency issue	Quote currency vs price-list mismatch.	Robot

3 Sales Manager SALES — WeCPQ

Approve pricing

Where the margin is below policy or the discount is high, reviews the pricing and approves it before the quote can go out. Standard-margin quotes skip this step.

→ Produces: **Pricing approved**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Approval needed	Discount / margin outside policy.	People
Approver unavailable	Sign-off stalls.	People
Non-standard T&Cs	Legal / finance sign-off required.	People
Rejected pricing	Sent back to the rep to rework.	Agent → People

4 Sales Representative SALES — WeCPQ

Send the quote

Downloads the quote as a PDF and emails it to the customer, then sets the quote status to Sent.

→ Produces: **Quote PDF sent (status: Sent)**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Email bounce / wrong contact	Quote doesn't reach the customer.	Robot
Validity / expiry	Quote lapses before a decision.	Robot
Change requested	Customer asks for a revision (new version).	Agent

5 Sales Representative SALES — WeCPQ

Record outcome (Won / Lost)

Records the outcome: the customer accepts or declines. The rep marks the quote Won or Lost. A Won quote becomes read-only and hands over to Order-to-Cash (Process 2).

→ Produces: **Quote Won or Lost**

EXCEPTIONS THAT CAN OCCUR HERE

EXCEPTION	WHAT HAPPENS	SUGGESTED TO-BE
Negotiation	Customer counters; revised quote needed.	Agent
Partial win	Only some line items accepted.	Agent
Expired undecided	Quote expires with no decision.	Robot
Lost	Capture loss reason for reporting.	Robot
